EXPERIENCES

ltransition Group - Internship March 2025 - May 2025

[Demo](#) | [Backend](#) | [Frontend](#)

- Completed multiple frontend tasks under strict guidelines and deadlines, with regular mentoring sessions.
- Successfully built and defended a full-featured form-based web application using React, TypeScript, Node.js, Prisma, PostgreSQL, Cloudinary, Bootstrap and further enhanced the final project by integrating additional features and Dockerizing the project.

EDUCATION

Bachelor of Computer Science at
Institute of Science and Technology
(IST)

2019 - 2025

SKILLS

- Expertise:** HTML5, CSS3, ES6, Bootstrap, Tailwind CSS, React.js, JavaScript, MongoDB, Express.js, Node.js, Next.js, Vue.js, Prisma, PostgreSQL, Redux
- Tools:** Git, Chrome Dev Tools, VSCode, Postman, Docker

CONTESTS

- [Codeforces Programming Contests](#)
- [Leetcode Challenges](#)

CERTIFICATIONS

- Complete Web Development Course With Jhankar Mahub**

LANGUAGES

- English
- Bengali

PROJECTS

University Management System

[API](#) [Backend](#) | [Frontend](#)

- Built this system with role-based access to control depending on whether they are students, faculty, or admins.
- This system is integrated with backend APIs for real-time updates, state management, and functionalities like semester and course management and student progress tracking.
- Tech Stack:** TypeScript, JWT, Express.js, Zod, MongoDB, Node.js, Redux, Mongoose, React.

Hotel Booking System

[Demo](#) | [Frontend](#)

- This system has functionalities such as searching for hotels, sorting them by rating, viewing detailed information, booking rooms, and managing bookings
- Tech Stack:** Next.js, Tailwind, NextAuth.js, MongoDB

Kanban Board Application

[Demo](#) | [Backend](#) | [Frontend](#)

- Built an interactive full-stack Kanban board with drag-and-drop task management, editable tags, priority levels, user authentication, dark mode, and persistent state management.
- Tech Stack:** Vue 3, Tailwind, NestJS, PostgreSQL, Prisma, Clerk Auth

Car Renting Platform

[Demo](#) | [Backend](#) | [Frontend](#)

- Developed a full-stack car renting platform with role-based access control (Admin, Driver, User), enabling users to rent cars, drivers to place bids, and admins to manage cars, users, rentals, and system analytics.
- Tech Stack:** React, TypeScript, Redux, shadcn/ui, Node.js, Express.js, MongoDB.

Notion Clone

[Demo](#) | [Frontend](#)

- The Notion Clone is a collaborative note-taking application that integrates features like real-time editing and a rich text editor.
- Tech Stack:** Next.js, Tailwind, liveblocks, shadcn/ui, clerk, Firebase
